Summary

React & MERN Stack Web Developer with hands-on experience building scalable, user-friendly web applications using React.js, TypeScript, Next.js, Node.js, Express.js, and MongoDB. Strong in REST API integration, authentication systems, payment gateways, and responsive UI development. Passionate about clean code, performance optimization, and long-term growth within collaborative teams.

Skills

Frontend Development: React.js, TypeScript, Next.js, JavaScript (ES6+), HTML5, CSS3, TailwindCSS

Backend & Database: Node.js, Express.js, MongoDB, REST APIs, JWT Authentication

State Management & Libraries: Redux • TanStack Query • shadcn/ui • Material UI • Mantine UI

Soft-Skills: Problem Solving • Team Collaboration • Quick Learner • Adaptability • Self-Managed

Experience

Junior Full-Stack Developer — Freelance / Personal Projects

2024 – Present

- Developed full-stack MERN applications with **React, TypeScript, Node.js, Express, MongoDB**
- Implemented **secure authentication** (JWT + Firebase) and role-based access
- Integrated **Stripe** for subscription and payment workflows
- Built dashboards that reduced page load by 25% and improved navigation time
- Improved UX and performance through component optimization and API caching
- Deployed production-ready apps on **Vercel & Netlify**

Personal Projects

1. Shifa – Role-Based Full-Stack Healthcare Platform (Team Lead) | 2026

[GitHub](#)

Led a team-based development of a scalable healthcare/service management platform with secure authentication, protected dashboards, and production-ready deployment.

- **Leadership & Architecture:** Led a 3-member team, designed system architecture, defined database schema (MongoDB), and enforced clean modular API structure using Next.js App Router.
- **Secure Role-Based System:** Implemented RBAC using NextAuth (OAuth + Credentials), protected routes, server-side session validation, and secure password hashing.
- **Production & Performance:** Optimized MongoDB queries with proper ObjectId handling and indexing; configured environment-based deployments (Preview/Production) on Vercel.

Technologies: Next.js, TypeScript, NextAuth, MongoDB, TailwindCSS, REST APIs, Vercel

1. Mess Manager – Role-Based Full-Stack Cost & Meal Management System

[GitHub](#)

Built a production-ready mess management platform with secure role-based access, real-time meal tracking, and cost distribution logic.

- **Full-Stack Architecture:** Designed scalable backend with Next.js App Router and MongoDB (normalized schema + aggregation pipelines for reports).
- **Secure RBAC System:** Implemented RBAC using NextAuth (OAuth + Credentials), protected routes, server-side session validation, and secure password hashing.
- **Advance Data Handling & Reporting:** Build dynamic tracking with date range filtering and summaries with real time cost calculation using MongoDB aggression for performance optimization. And Developed an email-based invitation system.

Technologies: Next.js, TypeScript, NextAuth, MongoDB, TailwindCSS, REST APIs, Vercel

2. AabhawaX – Weather Information App (July 2025)

[GitHub](#)

Built a weather app showing real-time conditions, 5-day history, sunrise/sunset, humidity, pressure, and wind direction using live data.

- **Real-Time Weather Data:** Displays live temperature, humidity, pressure, wind direction, and current conditions.
- **City Search Functionality:** Allows users to search weather information by city with fast, accurate results.
- **Forecast & Sun Details:** Shows 5-day forecast along with sunrise and sunset times.

Technologies: ReactJS, TypeScript, TailwindCSS, Tanstack Query, Shadcn etc.

3. Sojib Ahmed – Web Developer Portfolio (June 2025)

[GitHub](#)

Portfolio of **Sojib Ahmed**, a React & TypeScript web developer, showcasing modern web applications built with performance-focused and scalable frontend technologies.

- Built with **React.js & TypeScript** for maintainable, scalable, and type-safe development.
- Showcases real projects with a focus on **clean UI, performance, and user experience**.
- Optimized for **SEO and discoverability**, making the portfolio searchable on Google (e.g., “*Sojib Ahmed Web Developer*”).

Technologies: ReactJS, TypeScript, TailwindCSS, Framer Motion, Axios etc.

Education

-
- **BSc. in Computer Science & Engineering (CSE)**
University of Scholars — Dhaka, Bangladesh
2025 - Ongoing

Language

-
- **Bangla** – Native
 - **English** – Fluent
